Subject: FW: Questions Regarding FCC ID: VE3-STS1

Hi Greg,

Here are your answers in Red:

1. Please describe the antenna, and address Section 15.203.

The antenna is inseparable from the PCB board which is internal to the unit and is therefore not user accessible. This meets the antenna requirements as described in 15.203.

2. Please verify that the modification required for compliance (addition of the ferrite core to the power adapter cable) will be implemented in all units sold.

The ferrite core will be implemented on all adapters.

3. Please resubmit the user's manual, including the statement required by Section 15.21.

The manual has been amended to include the statement as required by Section 15.21. See page 8 of attached revised manual.

4. The Confidentiality Request references exhibits that were not submitted (e.g., parts list, circuit description). Please resubmit a Confidentiality Request that only references exhibits that have been submitted.

Please see attached revised confidentiality request letter.

.
